Poly rattan is a great source for unlimited creativity of furniture and housing decoration. Not only chairs, tables but other accessories can also be made using this material. Thanks to our skillful workers and constant research for new models, our accessories are diverse and ready to transform any common spaces to be something unique.

Rope Wicker

Rope's simple, striking look, durability, and flexibility make it ideal for diverse designs in fashion and decor. It's a top choice for weaving wicker furniture, especially outdoor pieces, due to its unique beauty.

Sigma Wicker

Introduced at VIFA Fair 2018, Sigma wicker, a thick, hollow, round poly rattan with harmoniously blended contrasting colors, creates bold, eye-catching designs for niche markets.

Poly Rattan

Poly rattan's durability, beauty, and versatile shapes, sizes, textures, and colors inspire ATC Furniture to innovate, creating trendsetting furniture designs.

Teak Wood (Optional)

Just like the human fingerprints, every teak tree out there is one of its kind. Even within the parameters of any managed plantation environment, no two trees share the same ground or reach for the light in the same way. For that reason, each tree grows and matures in its own unique way with the natural variations and irregularities that give the timber its inherent appeal. With every growth ring, every knot, every graceful ebb and flow of the grain stands a testament to its journey from a young sapling to mature tree – a journey of up to 70 years. But they all have one thing in common, which is to produce one of the finest woods on the planet that you could possibly find.

Teak Wood (Optional)

Just like the human fingerprints, every teak tree out there is one of its kind. Even within the parameters of any managed plantation environment, no two trees share the same ground or reach for the light in the same way. For that reason, each tree grows and matures in its own unique way with the natural variations and irregularities that give the timber its inherent appeal. With every growth ring, every knot, every graceful ebb and flow of the grain stands a testament to its journey from a young sapling to mature tree – a journey of up to 70 years. But they all have one thing in common, which is to produce one of the finest woods on the planet that you could possibly find.
