No introduction is needed when speaking of Sunbrella fabrics because its brand and quality are very well known by the vast majority of consumers. That is why ATC Furniture is proud to be one of Sunbrella's verified suppliers here in South East Asia. Just like buying directly from Sunbrella, we offer the same 5-year warranty period for Sunbrella fabric so you do not have to worry about the quality and durability of the product. Rope Wicker

Rope has been popularly used in many different design purposes from fashion clothing to house decoration thanks to its simple yet stunning looks. In addition, its durability as well as flexibility enable many designs to become reality in various shapes and sizes. All of which make rope become one of the top material options for weaving wicker furniture, especially outdoor wicker furniture, as it brings out an exclusive beauty that you cannot find in others.

Sigma Wicker

First launched in VIFA Fair 2018, this specially invented wicker has been our big hit since.

Sigma wicker has a round shape which is empty inside. It is thicker and bigger than other normal poly rattan, featuring two different and contrasting colors slowly descending into one another harmoniously. Therefore, the models woven of Sigma normally look solid, impressive and easy to attract people's attention at the first sight, meeting special demands for niche markets.

Poly Rattan

Poly rattan has been popular for over decades due to its durability and beauty. It has a variety of shapes, sizes and textures as well as colors, offering endless options to choose from.

Taking advantage of its multiform feature, ATC Furniture has been constantly researching and developing new different designs from poly rattan, aiming to come up with more and more remarkable furniture models to be a part as well as the lead of the latest trends in the market.

Teak Wood (Optional)

Just like the human fingerprints, every teak tree out there is one of its kind. Even within the parameters of any managed plantation environment, no two trees share the same ground or reach for the light in the same way. For that reason, each tree grows and matures in its own unique way with the natural variations and irregularities that give the timber its inherent appeal. With every growth ring, every knot, every graceful ebb and flow of the grain stands a testament to its journey from a young sapling to mature tree – a journey of up to 70 years. But they all have one thing in common, which is to produce one of the finest woods on the planet that you could possibly find.
